Vision of **Lahore Waste Management Company** is transformation of Lahore as one of the cleanest cities in the world by providing customized solutions in the consultation with citizens and private partners to ensure sustainable, safe, clean and green environment.

The LWMC has relied upon Mitsubishi Video Wall System for their central Control Room for Monitoring of the field activities of staff, as LWMC has indigenously prepared a state-of-the art Android Based Digital Monitoring System using the latest technologies. Android based mobile devices coupled with PHP based web portal has opened a new era of web based monitoring through display on Mitsubishi Video Wall being installed by **World Wide**

Project Profile:

The Prime Minister of Pakistan and Chief Minister of Punjab has relied upon Bosch CCS-900 Conference Address System for their Conference Rooms installed by **Bosch Distributor and System Integrator World Wide Vision Pvt Ltd. Islamabad.**

Lahore Waste Management Company,
Lahore

Android Based Monitoring through Video Wall.

Aiming to meet the requirements of monitoring the field activities of staff effectively, through an indigenously prepared state-of-the art Android Based Digital Monitoring System using the latest technologies, **World Wide Vision** has designed, supplied and installed **Mitsubishi Video Wall** at LWMC Control room. Android based mobile devices coupled with PHP based web portal has opened a new era of web based monitoring.

LWMC is using Video Wall for:

1. Operational Monitoring.
2. Mid course Correction.
3. Gaps Identification.
4. Operation Analysis.
5. Monitoring of real-time pictorial evidence of workers in all 150 UCs at 844 assembly points.
6. Monitoring Real Time Tracking of vehicles route.
7. Monitoring of vehicles speed limit.
8. Real-Time monitoring of Trips & Weight.

LWMC has now expanded its Android Based Digital Monitoring System at union council level across the city to put an end to the chronic issue of ghost workers. Pictures are taken by assembling field staff both at commencement & ending time of duty. Use of this mobile based application has built-in function to upload pictures of on-duty staff

Bosch DCN Multimedia [Gambat Institute of Medical Sciences, Gambat-Pakistan]

BOSCH
Invented for life

End User:

GIMS is a teaching hospital, It has been rated a first-rate teaching hospital at the level of a medical center by the Department of Health. In addition to its three missions as a medical center (providing medical services, teaching and training, and engaging in research and development), GIMS normally provides the best medical care available, during wartime its main function is to mobilize and integrate medical resources in different areas.

Business Objective:

Management of GIMS had to establish latest and Modern conference room equipped with such a device where audio, video and documents will be on fingertips which can result in more stimulating and more creative meetings, Hence Bosch DCN Multimedia Device put under consideration and finally installed in the conference room as it meets all the requirement of audio, video and presentation of multimedia content.

Installation and commissioning of Multimedia was completed in a short period of one week and its Value-added features, elegant styling finally meet

Meeting topics and links to documents can be prepared in advance. This is not only more comfortable for the participants; it also allows them to be informed on-the-fly, so discussions and decision-taking has become more efficient. In addition during meetings, all participants have access to the relevant documents electronically, which saves print costs and eliminates waste paper. And every person in the meeting has a multimedia conference device with high-resolution touch-screen at a very competitive price

Business Objective:

The Solution included the following:

- 40 x DCN Multimedia
 - 40 x Multimedia High directive microphone
 - 50 x anti reflective oil
 - 50 x multimedia name card holder
 - 1 x multimedia participant database
 - 1 x DCN multimedia audio power switching
 - 1 x multimedia power switch
 - 40 x DCN multimedia system network cable 2m
 - 2 x DCN multimedia system network cable 5m
 - 1 x DCN Multimedia system network cable 25m
 - 1 x multimedia camera control
 - 2 x HD conference dome with power supply
- And Following software were used:
- Multimedia prep. & management
 - Multimedia Sharing
 - Software maintenance agreement
 - DCN Multimedia system server Software

Key Success Factors:

- Easy to Install and use
- Elegant design
- Perfect audio quality
- Functionality with different applications
- Expandable system
